

NADDI MOUNIKA

Aspiring Software / Python Developer | Web Development | AI & Machine Learning
Hyderabad, Telangana, India | 7674896995 | naddimounika09@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Computer Science and Engineering student with hands-on experience in Python, Flask, SQLite, and Machine Learning, plus recent industry exposure through a frontend AI engineering internship, an AI virtual internship, and a data analytics job simulation. Built full-stack applications including an AI-powered Expense Tracker and a Student Management System, combining solid fundamentals in software development, database design, and problem-solving with practical, product-oriented delivery. Seeking internship opportunities in Software Development, Python Development, Web Development, and AI/ML.

EXPERIENCE

Frontend AI Engineering Intern — FlyRank

Internship

- Contributed to frontend development for AI-driven product features, collaborating with the engineering team on implementation and testing.
- Applied web development and AI integration skills in a real production environment, strengthening practical software engineering workflow.

AI Virtual Intern — CodeAlpha

Internship

- Successfully completed a virtual internship in Artificial Intelligence.
- Worked on AI-related projects and gained hands-on experience with machine learning concepts.
- Awarded a completion certificate for successfully finishing the internship.

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science and Engineering —

Expected 2028

JNTUH University College of Engineering, Rajanna Sircilla

TECHNICAL SKILLS

Programming: Python

Web Technologies: Flask, HTML5, CSS3, Bootstrap

Database: SQLite

Machine Learning & Data: Linear Regression, Predictive Analytics, Data Analysis, Generative AI Fundamentals

Tools: Git, GitHub

Concepts: OOP, CRUD Operations, Authentication & Authorization, DBMS

PROJECTS

AI Expense Tracker

Tech Stack: Python, Flask, SQLite, Bootstrap, Machine Learning

- Built an AI-powered expense tracking application using Flask and SQLite.
- Implemented user authentication and expense management.
- Developed a Linear Regression model for expense prediction.

GitHub: github.com/naddimounika09/Ai-Expense-Tracker

Student Management System

Tech Stack: Python, Flask, SQLite, HTML, CSS

- Developed a web application for student record management.
- Implemented attendance tracking, marks management, and admin authentication.
- Integrated SQLite database and CRUD operations.

GitHub: github.com/naddimounika09/Student-Management-System

CERTIFICATIONS & BADGES

- Data Analytics Job Simulation — Deloitte
- Introduction to Generative AI — Google Cloud (Course Completion Certificate)
- Introduction to Machine Learning Concepts — Microsoft (Badge)
- Python 101 for Data Science — covering Python programming fundamentals, data analysis basics, and problem solving with Python

ACHIEVEMENTS

- Developed 2 full-stack Python-based web applications.
